PROFILE

Final-year engineering student passionate about Full-Stack Development, skilled in Python and Java for backend development along with React, SASS, HTML, and JavaScript for front-end. Experienced in using Node.js, Express.js, and MongoDB to build scalable web applications, develop RESTful APIs, implement user authentication, and manage complete application workflows from UI to database, with strong teamwork, leadership, and a commitment to writing clean, efficient, and maintainable code.

EDUCATION

Nandha Engineering College, Erode, Tamil Nadu

B.E in Computer Science Engineering (Nov 2022 – May 2026) — CGPA: 8.2

Carmel Matric Higher Secondary School, Erode

Class XII (Jun 2021 – May 2022) — 76%

Class X (Jun 2019 – May 2019) — 66%

TEAM LEAD – TECHNICAL PROJECTS & MENTORSHIP

Team Lead – Mythical Mavericks

Nandha Engineering College – 2022 - Present

Managed a 5-member team to deliver 4+ technical projects successfully on time and with good quality. Organized sprints, assigned tasks, and managed development to full fill all project needs. Guided team members in coding and solving problems, enhancing team collaboration and efficiency. Supported ongoing learning, allowing myself and an additional member to be eligible for college-level hackathons.

PROJECTS

Campus Recruitment System – A full-stack MERN web application to streamline campus recruitment processes by implementing modules for candidate registration, job postings, and selection workflows using React, Node.js, Express and MongoDB. Role: Full-Stack Developer.

Map Review Application (Mapbox App) – An interactive location-based web app built with Mapbox, allowing users to add pins, write reviews, and rate places, with a responsive UI in React and backend integration using Express and MongoDB. Role: Front-End & API Integration Developer.

AI Legal Case Prediction System – Developed a Gen-AI powered legal prediction application that sends legal case inputs to an LLM, retrieves AI-generated predictions, and stores results in a database. Implemented backend logic, API integration, and data persistence using Python. Role: Project Developer.

SKILLS

- Programming Language: Python, Java.
- Web Development: HTML, CSS, JS.
- Frameworks: SpringBoot, React .
- Database: MySQL, MongoDB.

ACHIEVEMENTS

- Attended Innovation Day with projects on Sentiment Analysis , Web Crawling, getting good feedback for creativity and execution.
- Obtained Distinction in Typewriting Junior Level Test and First Class in Senior Level Typewriting.
